Time in {braces} if I saw a postman actually collecting. (Dates in italics & brackets = when entry last updated from letter box.) (Terminen in schraegschrift & klammern = letzte bekannt)

This <http://www.berklix.org/holz/post/> first created long before I found <http://standorte.deutschepost.de/Standortsuche>

& still useful as we find a single page pre printed on the wall faster than many Internet accesses covering 2 x PLZ (80469 & 80336 (S.Tor), + the Standortsuche needs an Umlaut keyboard, won't accept "Muenchen", else one must type 'M', wait then click München.
